## BEHEADED STATUE OF KING MUCH ABUSED

### Shaft Attacked by Irishmen Since 1701.

Dublin.—When a party of men recently cut the head from the equestrian statue of William III that stands near the Bank of Ireland in this city they accomplished the wish of at least one of their predecessors in the defacement of a monument which has been the object of attacks ever since it was erected first on the Dublin college green in 1701. "To chronicle all of the mishaps of this statue," says the Historian Chambers in recounting some of them, "would require a volume." He sets down the story of Watty Cox and some of Cox's forerunners and successors who have directed their attacks toward the likeness of the "hook nosed Nassau."

Cox was an eccentric. For many years the editor of the Irish Magazine, he was a man of varied talents. Before becoming an editor he had been a gunsmith and was expert in the use of tools. He was annoyed by the status of the English king who had secured the "predominance of the Protestant religion in Ireland," and one dark night tried to file off the monarch's head.

**Iron Foils Attempt.**

Perhaps he knew that under the coating of lead the statue was of iron; perhaps he did not. At any rate the iron "foiled" his attempt; and the head was left on the statue for other Irishmen better equipped to take off—just 130 years after Cox's failure.

Attempts to destroy or to dismember the statue began soon after it was set up. Many people took, it seems, an instant dislike for it—not only Catholics, but Protestants. The college boys in particular had toward it a feeling of hostility, because, it was said, "it turned its tail upon the university." We are told that "despite all magisterial denunciations notwithstanding," incessant mastreatment and indignities were put upon it. On June 27, 1710, "it was found to have been feloniously robbed of its regal sword and martial baton."

This robbery was too gross an offense to be overlooked by the authorities, who offered a reward of £100 for the discovery of the culprits. Money brought them to book; and three students of Trinity college were consecutively accused, tried and condemned to suffer six months' imprisonment, to pay a fine of £100 each and to be carried to College green, there to stand before the statue for half an hour with this inscription on their breasts: "I stand here for defacing the statue of our glorious deliverer, the late King William."

On account of their loss of prospects by expulsion from the college, however, and loss of health by imprisonment in a dungeon, the latter part of their sentence was remitted and the fine reduced to five shillings.

In 1904 the king's birthday fell on Sunday. On the Saturday night preceding, the watchman on the College green was accosted by a man, "seemingly a painter," Chambers relates, who stated that he had been sent by the city authorities to decorate the statue for the approaching festivities, "adding that the apprehended violence of the disaffected portion of the populace rendered it advisable to have the work done by night.

**Watchman Aids Painter.**

"The unsuspecting watchman assisted the painter in mounting the statue, and the latter piled his brush most industriously for some time. When, descending, he coolly requested the watchman to keep an eye to his painting utensils while he went to his master's house for more colors. The night passed away without the return of the painter, and at daybreak on Sunday morning the statue was found to be completely covered with an unctuous black pigment composed of grease and tar; while the bucket that had contained the mixture was suspended by a halter fixed around the lassited monarch's neck."

But the crowning catastrophe came to the statue in 1836. "One midnight in April of that year the statue blew up with a terrific explosion, smashing and extinguishing the lamps near by. The body was blown in one direction, the broken arms and legs in another, and the wretched horse, that had suffered so many previous injuries, was shattered to pieces." A reward was offered for the perpetrators, but it failed to bring them to light.

The statue was repaired and placed in its old position.

## Diamond Drill Cuts Expenses in Oil Hunt

Wichita, Kan.—Gone are the days when oil companies spent millions of dollars drilling wells simply on indications of surface geology.

Now prospective oil areas are examined by miniature drilling operations, known to the industry as "core drilling."

The core drill, three inches in diameter, has a diamond-edged bit. It bores into the shale and rock far beneath the surface, bringing up in a small receptacle samples of the formations at various depths for examination by trained geologists.

In Kansas, oil companies have core drilled from Wichita west to the Colorado line, a territory where more than 200 "wild cat" tests are under way. The recently discovered oil pools in the state are mainly in core-drilled fields.

### *England in Hawaii*

Hawaii is a detached territory of the United States. A small strip of ground on which the monument to Captain Cook was erected in 1874 is British territory, having been presented by a sister of a native king. The monument is at Kealakekua, and marks the spot where Cook was killed in 1779.

## PRIMER OF ALPHABET TURK'S BEST SELLER

### Population Going to School All Over Again.

New York.—Dictatorship is accomplishing in China, Turkey and Italy in a few years what heretofore has required centuries—the building up and enforcement of new languages. Turkey, in particular, is going to school all over again and everywhere and in book stores. The Latin alphabet, with the equivalent of each letter in the Arabic script, also is being displayed and sold for a few pennies on almost every street corner. Signs on the stores and shops are being changed to Latin characters, while the newspapers gradually are printing the news in the new type.

**Newspapers Help.**

"Schools have sprung up in every village," says Miss Adelaide DeNamara, director of exhibits in the New York city department of health, who recently returned from touring Europe, "and I was amazed to note the progress being made in Turkey. Not many years ago when I was there less than 10 per cent of the population was literate, but now every one you meet is reading, and the majority of them reading the new primer.

"Every day the newspapers print the picture of some familiar object with the name beneath in the old Arabic and the new Latin characters. In this way the entire population is gradually being taught the new alphabet. One of the most striking things I noticed was that the traveler on the railroads for the first time can read the names of the stations he passes.

"Mustapha Kemal seems to have won the whole country over to his point of view, and, at any rate, he is forcing the country to enlighten itself, for if the present desire for education continues every man, woman and child in Turkey will be able to read and write, something many countries cannot boast."

The new Latin alphabet is not only to come into current use but the Constantinople dialect is to become the criterion for Turkish pronunciation. According to Miss Elizabeth Marcuse, who is in charge of the Near East division of the Foreign Policy association, Miss Marcuse thinks the average Turk is sure to feel a relief at seeing the exact phonetic value as pictured by the new Latin lined alphabet.

"The Turkish primer, or alphabet, which President Kemal has sought to enforce upon the Turkish nation," says Miss Marcuse, "in place of the Arabic characters, imposes a number of characters whose phonetic values are borrowed mainly from the French and Hungarian alphabets, together with a few conventional characters adopted from the system in use among international orientalists.

**Turks, Mongolians.**

"A striking feature of the Turkish language, when transcribed into Latin characters, is the new phonetic values which lie hidden behind the garb of Arabic letters. It would appear to mind that whereas the Turks are a Turanian people and belong to the Mongolian race, the Arabs are Semites. When the Turks came in contact with the Arabs and absorbed their culture, customs and political heritage they adopted their religion and wrote their own language in Arabic characters. But the two languages Turkish being Turanian and Arabic Semitic are incompatible linguistically. Hence a marked difficulty arose.

"This difficulty lay mainly in that the Arabic language quite infrequently fails to produce the exact sounds of the Turkish vocables. So that a num ber of Arabic letters have had to acquire a new pronunciation. For instance, the word Turk itself may be transcribed into English thus: T, as in English; U, as in fluke; R, as in English; K, as in English. According to Arabic phonology, it should be pronounced Toork. But the Turks pronounce it Turk, the U as the French pronounce it, thus creating a new sound to the Arabic U, or Waw as the letter is called."

## New Aluminum Soldering Process Has Big Value

Stockholm.—A new method for tinning and soldering aluminum has just been evolved by two Swedish inventors, G. M. Eklund and Harry Johansson. Through this process it is possible at a very moderate cost to solder aluminum effectively and to plate aluminum with tin, a coating sufficient to resist corrosion in ordinary household use. The invention will be of great practical value and has already attracted considerable attention among metal experts in foreign countries.

## Cuba Prohibits Music of Old Spanish Day

Havana.—The Cuban government has forbidden the playing of all reminiscent of colonial days in Havana. It was pointed out that many of the tunes were closely associated with the execution of Cuban patriots. The ban considered most objectionable were La Marcha de Cadiz and El Tambor de Granaderos.

### *Teaches Home Economics*

The United States bureau of home economics was established in 1923. It fills a dual role. Its findings are valuable to those who are interested in intelligent consumption and to those interested in efficient production of household equipment, foodstuffs and other goods and services used in the home.

# A FARMER *and a* COUNTY AGENT *really wrote this "Ad"*

A COUNTY Agent and a farmer were talking about fertilizing crops . . .

*Farmer:* "What's the best fertilizer?"

*County Agent:* "Chilean Nitrate."

*Farmer:* "Why?"

*County Agent:* "It's the quickest acting nitrogen. Soon as you put it out it goes to work. Seems to pull crops through 'tight' places. Helps you make some real money."

And there you have the complete answer to the fertilizer question. We only want to add that Chilean Nitrate is the old original "Soda", the natural nitrogen fertilizer that cotton champions and corn champions have used for years to make their winning crops. Chilean Nitrate will show substantial profits on every type of crop . . . cotton, corn, small grain, fruit, truck, tobacco. Pasture grass, too!

Charles Cooper, Stephenson, Frederick County, Va., applied 4 lbs. Chilean Nitrate per tree to 11 apple trees. Apples from these trees were larger, better colored and—more important—these 11 trees produced an increase of 23 barrels, thanks to Chilean Nitrate.

*Fertilizer Book Free*

Our new 44-page book "How to Use Chilean Nitrate of Soda" tells how to fertilize all crops. It is free. Write for Book No. 1 or tear out this part of this ad and mail it with your name and address written on the margin.

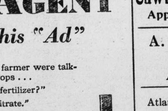
## Fuel system of the new Ford has been designed for reliability and long service



THE practical value of Ford simplicity of design is especially apparent in the fuel system.

**The gasoline tank is built** integral with the cowl and is unusually sturdy because it is made of heavy sheet steel, terne plate to prevent rust or corrosion. An additional factor of strength is the fact that it is composed of only two pieces, instead of three or four, and is electrically welded—not soldered.

Because of the location of the tank, the entire flow of gasoline is on even, natural flow—following the natural law of gravity. This is the simplest and most direct way of supplying gasoline to the carburetor without variations in pressure. The gasoline feed pipe of the new Ford is only 18 *inches long* and is easily accessible all the way.

The gasoline passes from the tank to the carburetor through a filter or sediment bulb mounted on the steel dash which separates the gasoline tank from the engine.

The carburetor is specially designed and has been built to deliver many thousands of miles of good service.

Since all adjustments are fixed except the needle valve and idler, there is practically nothing to get out of order.

The choke rod on the dash acts as a primer and also as a regulator of the gasoline mixture. The hot spot manifold insures complete vaporization of the gasoline before it enters the combustion chamber of the engine.

As a matter of fact, the fuel system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The filter or sediment bulb should be cleaned at regular intervals and the carburetor screen removed and washed in gasoline occasionally the drain plug in the bottom of the carburetor should be removed and the carburetor drained for a few seconds.

**Have your Ford dealer look after these important little details for you now and you have the car oiled and greased. A thorough, periodic checking-up costs but it has a great deal to do with long life and continuously good performance.**

A. H. CLEMENT, Editor.

THURSDAY, FEB. 21, 1929

February is a month full of interest to Americans—George Washington saw the light on 22nd, Abe Lincoln on the 12th and the groundhog on the 2nd.

It won't be long now until the field will be filled with Gubernatorial candidates — As yet we have observed no enthusiasm among the people for any of the entrants.

And Uncle Andrew Mellon has consented to ask Congress to give him two and half million dollars more for the dry enforcement cause. Verily the wets are to bear the burdens of enforcing the laws of the drys.

Col. Linbergh has capitulated—Cupid's unerring aim brings him from his throne in the air to be forever the subject of Queen Ann. Whatsoever goes up is bound to come down.

### HOW ABOUT IT

Buck says:

No man in any community is as closely connected with all its interests as its editor. All others reach special interests only. The merchant has his customers, the preacher his congregation, the doctor his patients, the lawyer his clients. Neither can get far out of his own circle. The editor comes in contact more or less, with all these interests. He is the only man in the community who can have friendly contact with all of them without being suspected of trying to further his own interests or the interests of his own group. The editor is expected to deal with all groups, all factions, all interests. It is a part of his work and duty. He is not living up to the full possibilities of his job unless he does. And a community is not getting all it should have from its newspaper and its editor unless it encourages such relationship.

### ROCKS NEWS

Mrs. D. W. Dinkins, Miss Annie Ranson, Mr. and Mrs. Lacy Martin were shopping in Lynchburg last week.

Mrs. D. R. Inge and little son, Claiborne, have returned from Roanoke, where she has been attending the bed side of her daughter, Mrs. R. E. Roach. The stork left in this home a nine lb. boy, William Rodney.

Misses Mammie Joe and Bradley Cawthorn are in Lynchburg at work.

Mr. Hunter Martin continues very ill.

We are very glad to know Mrs. Lillie Inge is able to be going around again.

Mr. B. D. Dickerson is improving.

Mrs. Laura Roach is visiting in Roanoke this week.

Master John Henry Ranson was struck by an automobile Sunday, while crossing the highway, on his way home from church and very badly hurt, but we hope nothing serious. The horse had to be killed as his leg was broken.

Mr. Frank Ranson sold tobacco in Lynchburg today with satisfactory prices.

Miss Myrle Dinkins is visiting Miss Gladys Ranson this week.

Mr. S. M. Ranson is not so well at present.

### *The British Flag*

The British flag floats over about one-fourth of the habitable area of the globe.

## TRUSTEE'S SALE

### Valuable Appomattox Farm

By virtue of authority vested in me by deed of trust dated on the 19th day of July, 1919, executed by Willie E. Patterson and wife and of record in the Clerk's Office of Appomattox County in deed book 19 at page 309, default having been made in the debt therein secured and being required by the holder of the debt to do so, I will offer for sale at public auction on

**Saturday, February 23, 1929**

at 11 a. m., in front of Appomattox C. H. at Appomattox, Va., the following described real estate:

That certain tract of land situated in Stonewall District, two miles South of Oakville, Va., and immediately on the East side of Oakville and Spout Spring public road, and on Elk Creek, adjoining Kemper L. Harris and others, being the same land conveyed by Stephen Woolridge and wife by deed dated on the 18 of Feby. 1910, and of record in Clerk's Office of Appomattox, deed book 11 at page 486 to which reference is made for further discription of said property, containing 75 acres, more or less.

Said Stephen Woolridge and wife have reserved a 15-foot road from Oakville and Spout Spring road over this land to said Stephen Woolridge—and, sale is made subject to said reservation.

There is a splendid dwelling house and necessary outbuildings on this farm, and the quality of the land is good and would make a desirable home for any one—close to church and school, and most of the land is in cultivation.

Terms: Cash, but more reasonable terms may be arranged by seeing the trustee before day of sale.

A. H. CLEMENT, Trustee.

## NEWS REVIEW OF CURRENT EVENTS

### Engagement of Anne Morrow and Lindbergh—Doings of Congress.

By EDWARD W. PICKARD

JUST as he was sitting at Havana on his return flight from the Canal Zone, Col. Charles A. Lindbergh's engagement to Miss Anne Spencer Morrow was announced by the young lady's father, Dwight W. Morrow, ambassador to Mexico. The colonel declined to talk about it to the reporters. It was understood in Mexico City that he would fly there late this month and that, though no plans had been made for the wedding, it might take place this spring. Anne is twenty-two years old and vivaciously pretty. She is a graduate of the Chapin school in New York and of Smith college, and while in school showed ability to write quite good poetry. When Colonel Lindbergh was in Mexico City as the guest of Ambassador Morrow he took Anne for several short flights, but her sister Elizabeth also was his passenger, and the gossipy reporters were uncertain then as to which one might become his fiancee.

Colonel Lindbergh had no sooner landed at Miami from his Central American trip than he started on again on two rescue flights. The first was over the Florida keys in search of a plane from which two persons were taken by a ferry boat after it was forced down; the second was made to try to find Pilot Harry Rogers, who had gone in search of the first plane and was himself missing for a time. Concerning the Panama mail route he had just inaugurated, he said:

"There is not a great deal to be done before daily service can be inaugurated between Miami and Panama. Better facilities for communication are being installed and other facilities to aid flying are being put into condition to augment the service."

As to passenger traffic between the North and South Americas, Colonel Lindbergh said it was not planned to haul passengers "until the most minute details of transportation and communication have been worked out."

THERE is now no doubt that Hoover and Curtis were elected President and Vice President of the United States last November. Congress in joint session last week received and counted the electoral vote and Vice President Dawes announced that the tally sheets showed the Republican nominees had received 444 electoral votes and the Democratic nominees 87. Thereupon he formally declared Hoover and Curtis elected. These proceedings were supposed to be solemn and stately and the Vice President had requested that there be no applause or other manifestation of approval or disapproval, but the senators and representatives soon broke loose and indulged in gales of laughter and vigorous applause, especially the confusion and mistakes of some of the tellers and declining to be subdued by General Dawes' gavel-hammering.

PRESIDENT COOLIDGE feels that the major work of his administration is ended and already is packing up his belongings for return to his home in Northampton, Mass., where he probably will reside for at least a year. He and Mrs. Coolidge expect to leave the White House the afternoon of March 4, immediately after the inaugural ceremonies, and because of the illness of Mrs. Coolidge's mother Ex- will lose no time in starting northward.

On Wednesday the President signed the bill for the building of fifteen cruisers and one airplane carrier and approved the appropriation of funds to begin the construction of these vessels at once.

Naval officials and adequate navy advocates in congress hailed the approval of the bill with enthusiasm. Secretary of the Navy Wilbur expressed gratification. In his opinion, the construction of the fifteen cruisers marks the beginning of a wholesale replacement program which will result in the modernization of the fleet and eventually in an American navy second to none.

Representative Fred A. Britten, chairman of the house naval committee, said his committee will begin new hearings next fall to determine how many more ships should be authorized as replacements for the rapidly aging battleships, cruisers, destroyers and submarines in the battle and scouting fleets.

PRESIDENT-ELECT HOOVER had been expected to remain in Florida until a day or two before the inauguration, but last Wednesday he announced that he had a lot of work to complete in Washington in preparation for the new administration, and therefore would leave Miami for the national capital on February 18 or 19. The latter part of the week was devoted to a trip of inspection through the flood and reclamation district of central Florida. The Edison birthday party at Fort Myers on Monday was a great success and was much enjoyed by Mr. Hoover; but the weather was too blustery for good fishing on the west coast.

Secretary of Agriculture Jardine removed himself from the Hoover cabinet possibilities by the announcement that he had accepted a position as counsel for the Federated Fruit and Vegetable Growers, with his offices in Washington.

CONGRESS was asked by the President to appropriate $9,210,500 for the construction of new public buildings in 92 cities scattered throughout the country. This is the amount needed to meet building costs during the first year. The projects when completed would represent an outlay of $46,700,500. Mr. Coolidge also approved budget bureau estimates for the expenditure of $48,000 to remodel and furnish the weather bureau station at Mount Weather, Va., as a summer home for Presidents, this plan being in accord with his suggestion made last fall. Mount Weather, near Bluemont, Va., and about 60 miles from Washington, is an 864-acre tract, high in the Blue Ridge mountains, on which the weather bureau, until a few years ago, conducted some of its most important observations.

INTERNATIONAL experts selected to consider the matter of German reparations began on Monday in Paris the conference that is expected to result in a revision of the Dawes plan, the fixing of the total sum Germany must pay and the subsequent evacuation of the Rhineland by the allies. Owen D. Young, one of the unofficial American delegates, was the unanimous choice for chairman, and after the necessary ceremonies he lost no time in setting the commission to work. Germany had its leaders there and Dr. Hjalmar Schacht, president of the reichsbank, presented his country's case in a way that seemed to make an excellent effect on all the delegates except the French. He was moderate and made no specific demands but insisted Germany cannot continue to pay the annuities of two and a half billion gold marks provided for by the Dawes plan. He was questioned closely about the tax burdens of Germany, which the allies assert are less than their own. He offered to prove that this was not true. Doctor Schacht and his associates continued through several days. Correspondents said it was becoming apparent that the French and German points of view were not so divergent as was feared and that the success of the conference seemed assured.

THIS is the most severe winter Europe has experienced for many scores of years, and the suffering throughout the entire continent is most grievous. Extremely cold weather, deep snowfalls, ice and furious storms prevail, many human beings have perished, and the loss of live stock is tremendous. Transportation is disorganized in many regions and towns are suffering for food and fuel. Harrowing stories of death and suffering come especially from central Europe.

HAVING given Gen. Bramwell Booth his chance to be heard, as ordered by the English courts, the high council of the Salvation Army again voted to depose him as commanding general, and then elected Commissioner Edward John Higgins to succeed him. The final count was 42 votes for Higgins and 17 for Evangeline Booth, head of the Army in America.

General Higgins has been chief of staff since 1918. He was born at Highbridge in Somerset and educated at Doctor Morgan's school at Bridgewater, Somerset.

### *Strangest Migration*

This is the season of the return of the caribou to Alaskan feeding grounds. These animals travel in a huge circle below the arctic, stopping their feeding grounds once a year. Seven million animals are in the herd.

### *Ancient Civilization*

Chinese traditions carry the story of civilization in eastern Asia back to about the year 2852 B. C. The story begins with a legendary ruler, Fuhsi, who is said to have been the organizer of society in the time when the people lived by hunting and fishing.

# Guggenheimer's Semi-Annual Sale of Toiletries

## Begins Saturday, February 23rd---Ends Saturday, March 3rd

Supply your needs on scores of household, personal and beauty aids at most remarkable savings.

Mail and phone orders will be carefully filled. Call or write Miss Jane Snow, your personal shopper. If you mail your order, kindly enter the desired quantity opposite the article listed.
